

LIFE LINE: Revolutionizing Blood Management

A comprehensive platform for a healthier tomorrow.

Introduction to Life Line

Life Line is a full-fledged **web-based platform designed to manage and automate the blood donation process. It bridges the gap between donors, recipients, and hospitals through a centralized online system, enabling real-time emergency blood request handling, smart donor matching, and inventory management accessible from anywhere. With its browser-based interface and cloud-backed architecture, Life Line ensures fast, secure, and seamless coordination among all stakeholders.**

Life Line – Unique Web-Based Features

Live Blood Inventory Heatmap

- Interactive map view showing real-time blood stock availability.
- Color-coded pins (Green = surplus, Yellow = moderate, Red = urgent shortage).
- Search and filter by blood group, city, or hospital.

Smart Donation Scheduling

- Automatically calculates the next eligible donation date for each donor.
- Sends gentle reminders (email, SMS, or WhatsApp).
- Provides a calendar booking system for nearby blood drives.

Donor Health Dashboard

- Tracks donation history, hemoglobin levels, and eligibility status.
- Displays recovery status post-donation.
- Badges & streaks: “Regular Donor,” “First Responder,” “Top Contributor.”

Emergency Circle Alert

- Creates location-based donor clusters.
- During urgent requests, pings all nearby eligible donors.
- Prioritizes based on distance and availability (saves time in crisis).

Analytics & Insights Panel

Provides **predictive analytics** for hospital administrators:

- Upcoming demand forecasts.
- Predicts blood group scarcity.
- Seasonal/weekly donation trends.

Helps them plan **blood drives proactively**.

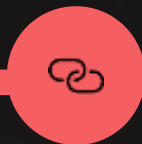

Community Engagement

Lets donors form **Donor Circles (college groups, workplaces, local clubs).**

- Shows impact score: "Your circle saved 57 lives this year!"
- Encourages friendly competition between groups.

Public API for Integration

Allows hospitals, ambulances, and NGOs to integrate directly:

- Auto-sync inventory levels.
- Auto-raise blood requests when stock drops.

Makes Life Line a **hub for the healthcare ecosystem**.

Disaster Mode Switch

- Activates during major accidents or natural disasters.
- Prioritizes emergency requests over routine ones.
- Shows only active donors and nearest hospitals to speed rescue.
- Can be triggered manually by an administrator or automatically based on incoming requests.
